MYSCAD STANDARD

Remarks : AutoCad is the trademark of Autodesk

MYSCAD Standard is the tool you need to easily create and manage your 2D and 3D drawing projects. It offers a visual development environment that can be either graphical user interface (GUI). It provides over 700 methods, properties and events. It is fully object oriented.

It also takes 2D & 3D drawing editing to a new level of functionality and ease of use. Designed for users who want control, power, and flexibility, this is the tool you need to easily create and manage your drawing projects. Its Automation objects expose methods and properties that are compatible with DWG objects.

Generalised CAD systems are often burdened with the task of serving the graphics needs of numerous and varied professions. In contrast, MYSCAD was designed for meeting the special needs of the civil engineering, surveying, construction, mapping, drafting and related professions.

→ FEATURES AND BENEFITS

MYSCAD is a full featured Windows based CAD system, focusing exclusively on the special needs of civil engineers, surveyors, construction contractors, and mapping professionals.

- Provides a full double precision point based coordinate geometry database, resulting in improved accuracy and data integrity.
- Delivers true designed-in support for the design conventions and geometric features commonly employed by industry professionals.
- Avoids the compromises faced by third party applications that are written within the limits of a more generalized CAD drafting environment.
- MYSCAD provides numerous key features that are unmatched by any other CAD environment and solves the most common and frustrating drafting production problems.
- Provides numerous mechanisms for capturing external data, as well as importing and exporting data in common file formats.

→ KEY BENEFITS

- Dual Language In One Cad Platform System.
- AutoCAD Compatible: MYSCAD is compatible with international CAD standards.
- 2D + 3D design, Raster Support, Rendering Facilities.
- More than 1000 Cad functions and key board command available. Customizable User Interface and commands.
 - Toolbars** - can be arranged with "drag and drop" functionality.
 - Menus** - can be re-organized with our graphical menu editor.
 - Screen** - items can be turned off for more graphics area.
 - Layout** - of command window - top or bottom and etc.
- The system is totally graphical and user configurable, giving the user complete control over the configuration for unit types, colors, attribute data, and feature display etc.
